UFO CRASH AT ROSWELL

BOOK REVIEW:

"U.F.O. CRASH AT ROSWELL", THE DEFINITIVE REPORT.

PLUS:

MEMBERSHIP CORNER, THE NATIONAL AND INTERNATIONAL U.F.O. REVIEW,
U.F.O.'S IN THE NEWS, L.I.U.F.O.N. NEWS AND THE LONG ISLAND SCENE

MEMBERSHIP MEETINGS:

The recent November membership meeting which was held on November 29th at the South Country Library was scheduled to show our news slide show presentation. Due to the fact that Kodak Laboratories still had some 200 slides still in for processing at the time of the talk, the full presentation was not able to be shown. Hopefully the February meeting will show the entire new show. Sorry for the difficulties.

Membership Meeting for December will be held on Friday, December 27th, 1991 at 6:30 P.M. at the South Country Library's Community Room located in Bellport Village. A video presentation will be shown dealing with the "Face on Mars", which will last one hour. A discussion on the tape will follow. The meeting is open to all members, their guests and the general public.

SPECIAL NOTICE

The January meeting of the Network will feature a special presentation on U.F.O. Abductions which will feature a video presentation on the subject. The second half of the meeting will feature a special closed session to LIUFON Members only. At that time all non-members will be asked to leave during the closed session. This will also include any guests that may accompany a member. The subject matter to be discussed is only available to LIUFON Members only. The reasons for this will be disclosed at that time to members only.

NEWSLETTER DELAY

The printing of our newsletter has still been delayed (2 months) due to the equipment malfunctions that occurred during the months of July and August. The breakdown of our photocopier and word processor threw our publishing schedule off and for the last several months, LIUFON has been trying to bring it up to regular sequence. The receipt of the November edition will bring the schedule into regular frequency. The December newsletter will be mailed during the second week of January.

MEMBERSHIP RENEWAL

Members who should have received membership renewal notices during November and October will receive such notice at the end of December. Due to the delayed printing schedule of the newsletter, those members have had their membership extended for two months as a courtesy due to the publishing delay.

MEETING SCHEDULE

The new membership meeting schedule will be published with the listings for the upcoming membership meetings for 1992 in the December newsletter which will be mailed during the second week of January.

LIUFON NEWS

***** The gang at LIUFON is busy as ever. The year is drawing to a close and the investigative record for 1991 reveals a total of some seventy cases received and investigated during the year of 1991. The activity on Long Island and the Metropolitan area continues with no end. LIUFON will continue to investigate and report its findings. ***** Director of Investigations Frank Columbo and his wife are expecting a new addition to the family in February. The blessed event is eagerly expected by all at LIUFON as we know it is by Frank and Grace. ***** Tim Beckly of "UFO Universe", recently published our report on the Elizabeth Hess Manhattan Abduction Case in his recent issue. The article has drawn widespread praise and interest. ***** 30.

THE NATIONAL AND INTERNATIONAL UFO REVIEW NOV. 91

GULF BREEZE, FLORIDA SIGHTINGS CONTINUE.

GULF BREEZE FLORIDA, SEPTEMBER 6, 1991: Since January 1991, over the Pensacola Bay Bridge, witnesses have reported observing a large red light which has appeared in the early evening hours and has performed unusual aerial maneuvers. U.F.O. Researchers from the Mutual U.F.O. Network have been investigating the incidents and have also been able to obtain photographs of the nightly visitor. On the night of September 6th, 1991 some 20 witnesses gathered at the end of the Bay Bridge and were treated to a spectacular sighting of a large U.F.O. at 8:20 P.M. that night. The object appeared on a South to North course heading at a 60 degree elevation. The witnesses reported seeing the object and a large ring of porthole lights surrounding the object. The object was brightly illuminated and was so large that when it stopped it blocked out the night stars. At one point during the four minute sighting the object came to a stop and performed an incredible barrel roll while it hovered. It then proceeded to the North, turned vertically and accelerated up out of sight. Two nights later on September 8th, 1991, another crowd of witnesses reported observing another large U.F.O. with porthole lights blazing again over the Bay Bridge. The object was photographed and video taped on this occasion.
(The Sentinel, Gulf Breeze Florida, Sept. 12, 1991)

GULF BREEZE, FLORIDA, SEPTEMBER 10, 1991: Witnesses reported the presence of a large U.F.O. and a smaller one on the night of September 10, 1991 in the vicinity of the Bay Bridge again. Beginning at 8:20 P.M. that night witnesses reported observing a large red light appearing in the sky which was accompanied by a smaller red light. The large U.F.O. was observed for a bout a minute as it moved across the sky and faded. The smaller one stayed in a fixed position and was observed to gradually fade away. The position of the U.F.O. was 45 degrees on the horizon and was located over Old Navy Cove in Gulf Breeze. The witnesses consisted mostly of MUFON Investigators who reported that photographs were taken and were to be analyzed for scientific study.
(The Sentinel, Gulf Breeze Florida, September 12, 1991)

ALABAMA WITNESS TO GULF BREEZE SIGHTINGS: Marie Venable from Birmingham, Alabama and her son were visiting the Gulf Breeze area in Florida and notified the editor of "The Sentinel" that she had experienced five U.F.O. sightings in the Gulf Breeze area since the first of September. The first sighting occurred in the area of the Bay. The first two sightings consisted of a bright light in the sky that appeared and according to the witness was definitely not a star or plane. On September 5th, the witness reported that she and others observed a bright object that had rows of bright porthole lights around it. On September 6th, with a cheap pair of recently purchased binoculars, she reported that she observed with other witnesses a large U.F.O. float across the sky with a row of bright lights around its periphery. The object then flipped on its side and then turned out its lights. On September 8th, 1991, she and others observed the same object gain for about 45 seconds over the Bay.

(The Sentinel, Gulf Breeze, Florida, September 12, 1991)

ARGENTINE U.F.O. SIGHTINGS IN ARGENTINE U.F.O. TRIANGLE: Since mid-July, numerous UFO sightings and related phenomena have been observed in and around the city of Victoria, in the Argentine province of Entre Rios. Lights crossing the sky, actual craft and even extra-terrestrials have been seen and extensively photographed at Victoria during August. A television crew has reportedly filmed the landing of a craft.

UFO researchers are arriving in Victoria from all over the world. Even NASA has sent technicians loaded down with equipment. In mid-August extra-terrestrials were reportedly observed debarking from a landed UFO. An intense light was emanating from the craft, impeding observations of eyewitness, who described the beings as very tall.

In early September witnesses reported seeing ten small lights emerge from a larger light which had landed. They then dispersed, flying away at close to ground level. Shortly thereafter, the smaller lights re-entered the larger one, which then rose up in the sky and sped away.

Local television reporter Ramon Pereyra commented in a televised report: "up until now, many people refused to believe the (sightings) reports, but by now, 90% of Victoria's residents have seen at least once, these strange lights." According to: Edgardo Fontanet, spokesperson for an Argentine UFO Research Group, there is "no doubt that extraterrestrials have chosen their earthly visitations in a triangular area, with two of the points being located in Argentina - one at Victoria - and the other in Uruguay."

Further reports claim that a number of inhabitants from remote villages in the sightings have inexplicably disappeared after they had gone in search of the mysterious lights.
(INTERNATIONAL U.F.O. NEWS BULLETIN, Sept.-Oct. 1991, Vol. 2 No. 5, Diane Montrose editor.)

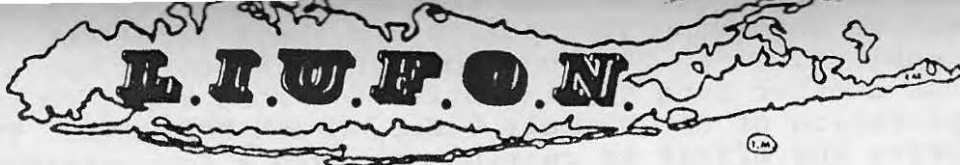

SAN BALTAZAR, PUEBLA PROVINCE, MEXICO: Researcher Zitha Rodriquez Montiel of Mexico's Centro Internacional de Estudios Espaciales A.C. is conducting an investigation into multi-sightings in the town of San Baltazar in Puebla Province throughout the month of August. More than 1000 people -virtually all of San Baltazar's inhabitants- have reported seeing a domed silver object shaped like a banana with lights on each end on a nightly basis. According to some witnesses, the UFO would always appear in the same place, hovering in the vicinity of a small white house in the town. People have come from all over Mexico in hopes of seeing the object. In fact, Rodriquez' son videotaped the UFO on two different occasions on August 10 and 14.

This isn't the first incidence of UFO activity this year in Mexico. The subject was given media coverage following sightings during the July 11th solar eclipse. A pair of witnesses videotaped two luminous objects as the moon blocked out the sun. Mexican journalist Jacabo Zabudovsky informed the public during the television broadcast of the program "24 HOURS" that two objects of silver color were seen crossing the moon during the eclipse in Mexico.

(INTERNATIONAL U.F.O. NEWS BULLETIN, Sept.-Oct. 1991, Vol 2, No 5., Diane Montrose editor)

U.F.O.'s IN THE NEWS:

**** The Clarkson-Harrison Public Library in Clarksburg, West Virginia has opened to the public a collection of books, correspondence notes, journals and periodical collections by noted ufologist Gray Barker. Gray Barker, who died in 1984, was a famous author and researcher in the 40's, 50's and 60's who also edited some of the leading UFO periodicals at the time. The collection is open to researchers and public by appointment.**** The Fund for UFO Research has announced it is giving cash awards for journalistic excellence for the best

THE LONG ISLAND SCENE

***** The activity on Long Island and in the Metropolitan area continues with no end in sight. The month of November was no exception as LIUFON's Investigators continued their efforts into the unexplained and unnatural. ***** In the beginning of the month LIUFON arranged with the cooperation of the witnesses in the West Islip Abduction Case a second hypnotic regression which was conducted by trained hypno-therapists under LIUFON's supervision. The principle witness in the case is a twenty seven year old nurse who was abducted from her home in May 1990. Her mother is also suspected as a participant, but has declined to be regressed. ***** The session picked up from the first regression where it had to be terminated due to a severe emotional reaction from the witness. **** From that point it was determined that the witness was escorted from her home by two eight foot tall humanoids and was marched around the back of her home to a landed oval shaped craft. Ordered to walk up a ramp into the ship, she is guided to a stool where she is instructed by several of the little greys present that she is going to be examined. While the ship lifts off, she observes the craft's progress from a window in the craft which leaves her terrified at the possible prospect of not returning. She is then removed to a table where she is subjected to a examination involving the insertion of a long needle like probe into her bad eye. The explanation is then given that her abductors want to see the cause of her weak eye. ***** She is then conscious of being returned to her home where she is permitted to return to bed. Her mother has maintained she saw nothing other than a robed figure in her living room which she mistook for her son and a bright series of light beams outside her living room window. It has been assumed that she may have saw the tail end of then abduction. ***** What has also emerged from the regression session is information pertaining to a little boy which has been frequently reported in dreams and recollections by the principle witness. The witness recalled prior experiences where she was abducted and shown the child which is not human. She recalls being informed that the child is hers and was the product of artificial insemination by her alien abductors. The estimated age of the child is around thirteen years and would correspond to gynecological problems the witness had when she was fourteen. **** The case is still under investigation and future regression sessions are planned. ***** Lindenhurst family comprised of a aunt and her nephew have reported in November a series of abduction experiences in their separate homes. LIUFON feels that the case may involve other members of the families and as many as three generations. The case is still under investigation and will proceed cautiously due to the fact one of the witnesses is a minor. It has been marked for future investigation. ***** Report from Lebannon New Jersey which was forwarded to LIUFON by Dick Ruhl through his F.A.A. contacts. The case was reported on the night of November 9th, 1991 by a family located in this small rural township which reported between 30 to 40 objects emerging from a low cloud which was near their home about a mile away at an altitude of 2000 ft. They estimated it lasted from 8:00 P.M. until 11:00 P.M. that night when the activity died down. The estimate craft size was between 300 to 500 feet.

 report

BOOK REVIEW: U.F.O. CRASH AT ROSWELL
BY KEVIN RANDLE AND DONALD R. SCHMITT
AVON BOOKS, 1991, \$4.95

This past spring saw the publication in paperback of one of the most important books to have published in the year of 1991. That book is "U.F.O. CRASH AT ROSWELL" by the co-authors of Kevin Randle and Donald Schmitt which is one of the most authoritative works published on the incident to date. It eclipses the work of the "Roswell Incident" which appeared in 1979 under the pen of Charles Berlitz and William Moore, which brought the incident back into public attention.

It was first reported by ill-fated author Robert Scully in his pioneering work on U.F.O.'s in the 1950's along with the Aztec Crash. Duped by deliberate hoaxers, Scully was publicly ruined and ridiculed by his association with the Aztec Hoax which also threw the Roswell Incident into disrepute. In the mid seventies, Stanton Friedman reactivated interest into the incident by meeting with witnesses who told a different factual tale. Researchers took it from there.

To date this book brings together more information and witnesses than the original effort into the incident had done. It does go over the information a lot of the original sources gave, but adds more information from new sources.

The book reveals a lot more, like this:

- 1) There was definitely a cover up of something other than a weather balloon crash at Roswell. The government file remains closed while the government refuses still to comment on the story.
- 2) There were definitely two objects. One which crashed on the Brazel ranch which may have been a robot craft which had rammed the second piloted craft causing that one to crash on the plains of St. Augustine in the New Mexican Desert. These two craft were retrieved by the military under top secret conditions.
- 3) There was an immediate attempt to cover up the facts of the incident by the Air Force and the Government even to retrieving all copies of the original Army Air Force press release and the closing down of the news wire services printing of the report.
- 4) Numerous civilian and military witnesses reported to researchers that there was something taken from the Brazel ranch which was not a Weather Balloon, but which was something other than what was reported. The metal fragments were of something not seen before on this Earth as substantiated by Col. Jesse Marcel and his adult son.
- 5) The Center for U.F.O. Studies financed further research into the case and also financed an unsuccessful archaeological dig into the field where the first object crashed on the Brazel Ranch. This was a first in U.F.O. History in which a major research organization sponsored a scientific expedition to unearth U.F.O. artifacts.

The book reveals a lot more information which makes this short review incapable of discussing. This is a must for the serious researcher and makes excellent reading. Put it on your must read book list for 1992 or a Christmas present list for someone who will appreciate it.
